PROFESSIONAL EXPERIENCE

Soseu Cake Business <i>Founder & Lead Full-Stack Developer</i> Architected and manage a profitable e-commerce platform, ensuring 99% server uptime for a growing user base. Programmed the backend infrastructure exclusively using Python and Django, deployed via PythonAnywhere.	Dhaka, Bangladesh 2023 – Present
bdapps <i>Junior Developer (Part-time)</i> Contribute to cross-platform application development, resource integration, and secure deployment procedures. Conducted a workshop program for 100 students.	Dhaka, Bangladesh Present

TECHNICAL PROJECTS

Smart Zikr [GitHub] <i>Flutter, NLP, Voice Recognition</i> Engineered a hands-free, AI-powered voice recognition app featuring fuzzy NLP matching and temporal locks to prevent miscounts. Designed a dynamic UI with haptic feedback and a gamified GitHub-style activity heatmap to track daily streaks.	Completed
Bangla_Chat <i>Flutter, Real-time Messaging</i> Developed a localized, real-time messaging application specifically designed and optimized for users in Bangladesh.	Completed
ConnectBD <i>Flutter, Django</i> Pioneered a unified communication directory built simultaneously for iOS, Android, and Web platforms.	Completed
BooksMart App <i>Flutter, AI Integration</i> Developed a comprehensive marketplace featuring secure payment gateways and live order tracking. Engineered an AI-driven recommendation engine to deliver personalized book summaries based on user behavior.	Completed
AGECE Detector <i>Python, CNNs, Data Scraping</i> Spearheaded the ML lifecycle, scraping and processing 75,000+ images to train demographic classification models.	Completed
Patient History System <i>Flutter, Firebase</i> Constructed a digital health record system prioritizing secure, real-time data storage and rapid retrieval for medical staff.	Completed

RESEARCH & PUBLICATIONS

Submitted Paper: *"Cross-Asset Framework for Tri-modal Based Altcoin Price Prediction Using Deep Learning"* – A framework integrating public sentiment from social media, on-chain metrics, and historical data to predict altcoin prices using deep learning models (LSTM, GRU). Achieved a peak R^2 score of 0.9649 for LTC in 24-hour forecasting.

Accepted Paper: *"A Machine Learning Framework for Multi-Class Diabetes Prediction Using Stacking Ensemble and SHAP Explainability"*

Ongoing Research: *"EthnoFace"* – Developing a predictive model for facial attribute detection via Deep Learning.
